Summary

Machine learning engineer focused on building scalable predictive models and data pipelines.

Skills

Python, TensorFlow, PyTorch, SQL, Docker, Kubernetes

Work Experience

ML Engineer at Data Insights (2020-2024)

Developed and deployed deep learning models for customer behavior prediction.

Data Scientist Intern at AI Labs (2019-2020)

Analyzed datasets and built prototypes of recommendation systems.

Education

BSc Data Science - Seoul National University (2019)

Projects

Customer Churn Prediction

Built a model to predict customer churn with 85% accuracy, improving retention efforts.
